

**Supplementary table 1. Multivariable logistic regression of risk of pneumothorax**

<b>Variable</b>	<b>OR</b>	<b>95% CI</b>	<b>p-value</b>
<i>Male sex (vs female)</i>	1.930	1.130–3.300	0.016*
<i>Age (per year)</i>	1.025	0.997–1.056	0.092

*The model was adjusted for sex and age. \* indicates statistical significance at p < 0.05.*
